

The **Greensite Covert Cam** is an entirely self-contained stand-alone 2-Megapixel device offered in your choice of housing. The can provides a false can bottom that conceals a Micro SD Card that will allow you to record up to 4-hours. Battery operated means there are no wires that can be detected.

The **Greensite Covert Cam** is perfect for gathering intelligence on suspected drug deals, gang activity or in motel room operations. You will not have to worry about your video being pixilated or grainy because it offers 2-Megapixel/1080p High-Definition recording with top of the line compression to give you the most video recording space on your SD card.

You can monitor footage via WiFi, LAN, 4G or connect directly using your smart phone and the app that is designed for this device.
